1. The shipyard at Kostrzyn (Küstrin) (053/V66) is engaged in reconstructing river port installations and repairing barges salvaged from the Odra (Oder) and Warta Rivers. About two-thirds of the 24 salvaged barges have been reconditioned and put back into use; 6 more are still undergoing repairs. The yard also makes repairs on the tugs and barges carrying coal from Silesia to Szczecin (Stettin). The yard employed about 400 persons in 1946, but that number has now been reduced due to insufficient funds. A second shipyard at Kostrzyn is also undergoing repairs, and will soon be available for constructing and reconditioning river craft.

50X1-HUM

2. Of the three waterway reservoirs which the Wroclaw (Breslau) Waterways Administration took over from the Germans, only one, the Otmuchow (Ottmachau) (P51/H64) on the Nisa (Neisse) River has been entirely repaired; this reservoir has a capacity of 95,000,000 cu. m. Work continues on the reconstruction of the Turawa reservoir (S92) on the Mala Panew (Malapane) River, with 1948 given as the date for completion; this reservoir will then have a storage capacity of 90,000,000 cu. m. The Wroclaw Waterways Administration has also begun work on a new reservoir of 65,000,000 cu. m. at Mianowice on the Bystrzyca River, but this project will not be completed for about five years.
